

St. Cecilia Catholic School

St. Cecilia Catholic School uses Constant Contact for sending mass email communications to parents including: the weekly Insider newsletter, Insider Alerts, Daily Prayers and other event specific emails throughout the year.

The school also uses FACTS Family Portal to allow teachers to send emails to parents – either individually, as a homeroom, or as a grade level.

Depending on the email platform you are using, sometimes those emails can go to a promotions / spam / junk folder. We have compiled some resources below from Constant Contact and FACTS to assist parents in safelisting the emails from St. Cecilia Catholic School so they go directly to your inbox. These resources will help ensure that you are not missing important information being sent from the school.

[Safelist Emails in AOL, AT&T, Comcast, Gmail, Outlook/Hotmail, Verizon, and Yahoo](#)

This link includes information on how to Safelist St. Cecilia emails from ending up in promotions / spam / junk. While the link above is from Constant Contact, the same procedures apply to emails from FACTS sent by teachers and this information linked above can be used to make sure emails from both systems are being sent directly to your inbox.

[Safelist Constant Contact Web Domains in a Security Program](#)

This link includes information on Constant Contact URL's and IP addresses that Constant Contact uses to send emails. This information is helpful for corporate email systems as you may need to provide this information to IT administration to make sure emails are going to your inbox.
